

FLOODGATE IRELAND SAND BAGS & SAND HOPPERS

Dry bag ready for deployment

Filled bag after 10 mins. in water

FLOODBAGS

Aqua Sacs are water absorbent bags supplied in boxes of 25 “drybags”. A box of 25 bags weighs approx. 13Kg & they have a shelf life of up to 10 years.

After 10 mins. in freshwater the bag will have absorbed 20Lit. of water to give a bag of 20Kg with a size of 525 X 400 X 200mm. Consistent size & shape makes the Aqua Sac a more effective barrier than conventional sandbags.

Bio-degradable after use.

EZ BAG KIT

The EZ bag kit consists of sandbags (14” X 26”), the EZ bagger filling tool & a pair of workgloves. Bags are

Kits are supplied as 50 bag & 100 bag kits.

The filling tool is designed to hold the sandbag open while filling in a scoop & tilt motion so that bag filling is a single person operation.

SAND BAG HOPPER

Many man hours are lost filling sandbags. The Sand Bag Hopper takes a standard JCB front end bucket load of sand. No electrical supply, no hydraulics, the hopper has two gravity fed outlets & two men can fill up to 500 bags per hour. The unit is easy to erect and is portable.

SAND BAG HOPPER

Single man sand hopper weighs only 10Kg. It is very compact & easy to transport. One man with a sandhopper can fill three times more bags.

Sandbagger
